**MINISTRY OF EDUCATION**

**ST LUCIA**

**MODERN LANGUAGES CURRICULUM**

**FOR LOWER SECONDARY SCHOOLS**

## 1.0 Foundations of the curriculum

The Curriculum for the Lower Secondary School in St. Lucia is informed by a long tradition of curriculum theories, processes and practices. Curriculum, according to Taba (1962), emerges from a seven-step sequence that involves:

1. diagnosis of needs;
2. formulation of objectives;
3. selection of content;
4. organization of content;
5. selection of learning experiences;
6. organization of learning experiences;
7. determination of what to evaluate and of the ways and means of doing so;

In identifying the curriculum needs of St. Lucia, extensive use was made for the official Government document entitles Education Sector Development Plan 2000-2005 and Beyond. In this document, the Government identifies the abilities the ability “to communicate in more than one language” as one of the intended outcomes of the Plan. Through the modern languages curriculum, students will develop the ability to communicate at a basic level in the target languages.

A major focus of the curriculum is Government’s commitment to a programme of universal secondary education. As such, the curriculum is designed to cater for students with diverse learning experiences and a wide range of abilities. The suggested teaching and learning activities are designed to be student-centered and to facilitate group work and team building activities. The suggested evaluation strategies place emphasis on authentic assessment that is continuous and varies to cater for the widest range of interests and abilities. Teachers are encouraged to monitor students’ work through continuous assessment feedback and reporting.

## **2.0      Rationale for Modern Languages in the Lower Secondary School**

The advent of the Caribbean Single Market and Economy (CSME) and the Free Trade Agreement of the Americas (FTAA) has made it increasingly important for every citizen of the Caribbean to become more familiar with the societies and cultures that share the Caribbean region with the English-speaking countries. To foster a deeper understanding of our neighbouring countries and their peoples it is vital that every secondary school student in the English-speaking Caribbean be able to communicate, even at the most basic level, with individual people whose native language is Spanish or French, the major languages other than English that are prevalent in the Caribbean region.

The curriculum for the Lower Secondary School in St. Lucia is intended to promote the languages and cultures of our neighbours in the Spanish- and French-speaking territories. Students will learn to appreciate these languages through acquisitions of levels of competency in the communicative skills in listening, reading, writing and speaking.

The syllabus will also expose students to Francophone and Hispanic cultures so that they will acquire a deeper knowledge of what distinguishes these cultures from their own. Thus, they will gain a deeper appreciation of the traditions, values and concerns of native speakers of these languages.

Upon completions of the syllabus, students should be able to upgrade their skills by proceeding to the CXC Modern Languages curriculum. Those who opt to discontinue the subjects at the end of the lower secondary school should have acquired sufficient knowledge and skills in the languages to functions in entry-level positions in the tourism or hospitality industries or other related sectors of the economy in which the knowledge of Spanish and French is required for improved performance.

### **3.0 Aim**

The syllabus aims to:

1. provide students with basic and meaningful communicative skills in Spanish and French;
2. foster an understanding and appreciation of Francophone and Hispanic cultures;
3. lay the foundation for further studies in modern languages.

### **4.0 General Objectives**

On completion of the syllabus students should:

- i. be able to converse meaningfully with native speakers of Spanish and French;
- ii. appreciate the cultures and lifestyles of the people who reside in the Francophone and Hispanic regions of the Caribbean;
- iii. be able to function in the language at a basic level through oral and written means of communications.
